LED Post Top Retrofit Kits

Green Inova released the new generation Post Top Retrofit Kits which is an energy-efficient and perfect solution for replacing traditional metal halides and high pressure sodium sources in post top fixtures.

With excellent optical design, it can reduce light pollution by eliminating upward light emission. Lamp includes an external UL LED driver for better thermal management ensures long life. 14W & 22W use special "X bracket", while 40W & 56W use screw-in base for easy installation.

They are rated for a long 100,000-hour lifespan and are backed by Green Inova's 5-year limited warranty.

1 14W & 22W
"X bracket"

2 40W & 56W
"screw-in base"

Features:

- ETL/cETL listed
- High output Nichia LEDs deliver up to 97 lm/W
- External UL approved high quality driver
